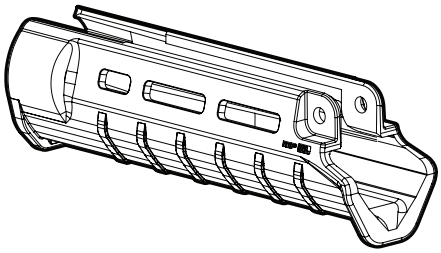
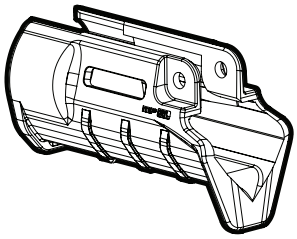
SL HAND GUARDS



MAG1049 MAGPUL SL HAND GUARD - HK94/MP5 & CLONES

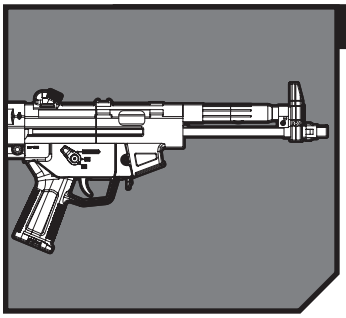


MAG1048 MAGPUL SL HAND GUARD - SP89/MP5K & CLONES

READ ALL INSTRUCTIONS BEFORE PROCEEDING TO AVOID LOSING ANY SMALL COMPONENTS

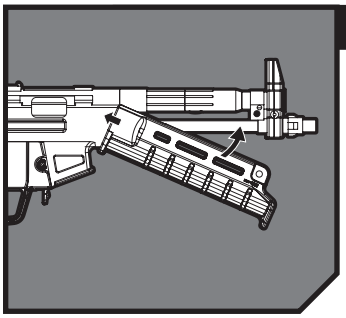
INSTALLATION INSTRUCTIONS

WARNING: BEFORE STARTING, MAKE SURE THE WEAPON IS UNLOADED, THE CHAMBER IS EMPTY, AND THE SAFETY ENGAGED.



STEP 1: REMOVE EXISTING HAND GUARD

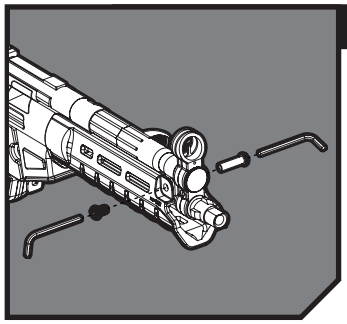
Remove the *existing hand guard* per firearm user manual.



STEP 2: POSITION SL HANDGUARD

Position the *SL Hand Guard* directly below the barrel. Move the *SL Hand Guard* upwards and rearwards (away from the muzzle) until the *rear support tab* seats firmly against the forward portion of the *receiver* surrounding the *barrel trunnion*.

Note: When correctly installed, the rearmost edge of the SL Hand Guard will slide over the forward portion of the receiver surrounding the barrel trunnion by approximately 1 inch before the rear support tab makes engagement.

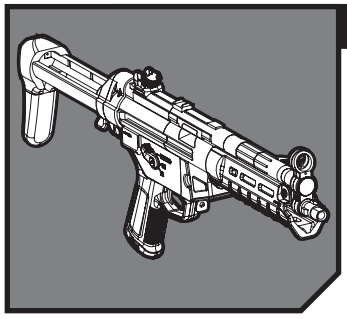


STEP 3: COMPELTE INSTALLATION

(A) Line up the *fastener holes* in the *SL Hand Guard* with the *fastener holes* in the *cocking tube support hanger*.
(B) Insert the *handguard binding post* from left to right (from the cocking handle side). Install the binding post screw, and tighten it to 15-20 in-lbs.

NOTE: It may be necessary to carefully use a non-marring tool such as a rubber mallet to lightly tap the SL Hand Guard rearward to line up the fastener holes due to manufacturing variations between firearms.

DO NOT force the fastener holes in the SL Hand Guard and cocking tube support hanger into alignment if they are grossly misaligned. Remove the SL Hand Guard, reference "Step 2: Position SL Hand Guard," and reinstall, ensuring that the SL Hand Guard is fully seated such that the rear support tab is engaged with the forward portion of the receiver surrounding the barrel trunnion.



STEP 4: VERIFY INSTALLATION

Perform final inspection including function check per firearm user manual to verify proper weapon function.

Always test fire your weapon before using it in an operational environment.
